

Vibraject[®] R3

Rechargeable Dental Syringe Attachment

With Rechargeable Battery Kit

Blocks Pain from Injections

Injections Are the Number One Fear of Dental Patients

- ▶ Pain associated with the administration of anesthesia can be greatly reduced or eliminated
- ▶ Effective for all types of injections including intraligamental palatal and blocks
- ▶ No topical anesthetic necessary
- ▶ Standard injection technique used
- ▶ Attaches to conventional syringes including intraligamental syringes
- ▶ Easy to use

*"It's brilliant in its simplicity,
powerful in its effectiveness."*

Alan W. Budenz MS, DDS, MBA
Professor, Department of Anatomical Sciences
University of the Pacific Arthur A. Dugoni School of Dentistry

*"In my practice, we use lasers,
magnification, intraoral cameras,
digital x-rays— all of the high tech
goodies. However, the Vibraject
provides the best bang-for-the-buck
in terms of doctor and patient satisfaction."*

Dr. Don McNamara
Elkhart, IN

Vibraject[®] R3 Kit
